## ECONOMIC STIMULUS PROGRAM

### LUTRON INTRODUCES LOWER PRICING ON HOMWORKS WIRELESS

Take advantage of this 25% price reduction on select wireless products.

Whether you're looking for solutions for a single room, multiple rooms or interested in controlling the light throughout your home with a light control system, Lutron gives you the freedom to personalize your light in any space. Seamlessly integrate light and daylight with Lutron shading solutions.

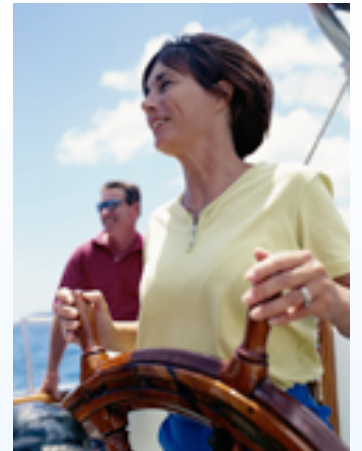

Once reserved only for new homes, a HomeWorks whole-home lighting control system, can be installed in older and historic homes as well as additions or renovations. The Wireless Series can be installed with only the use of a vacuum for clean up...YES - its that easy!

A HomeWorks system provides convenient, intelligent, and sophisticated control of your home's interior and exterior lighting.

Visit us on the web at [www.gnwireless.com](http://www.gnwireless.com)

By utilizing radio frequency (RF) technology, the Wireless series does not require special or additional wiring to install, making it ideal for existing homes or expanding a system.

The wireless series works as a stand-alone system and is compatible with the HomeWorks 4 series and 8 series systems.

#### Wind In Your Sails

Let Lutron sail you in the right direction. Lutron's been exceeding customers' expectations for years with the *ambiance, convenience, comfort, and energy savings that HomeWorks affords.*

#### Wireless Series

*Our most versatile system. Requires no additional wiring and integrates with 4 and 8 series.*

#### The Processor

*...are unseen and unheard but play key roles in the HomeWorks system. The processor is the heart of the system and provides the intelligence for automating lights at different times of the day. It even adjusts automatically for the changing sunrise and sunset time each day.*

*The processor has special modes for your home when you go on vacation or when the security system is tripped. The processor can also allow your lighting and shades to be integrated with automation systems, AV systems, and touch*

# HOMEWORKS - ECONOMICS STIMULUS PROGRAM

screen systems. For larger homes, signal repeaters are strategically hidden throughout the home to ensure coverage of every square foot.

## In-Wall Master Keypads

...are customized to provide control of the system from convenient locations throughout your home. Typical keypad locations include entrances, the master bedroom, and main all ways and rooms. Every button on a master keypad is uniquely programmed for your personal needs. Custom engraving is added to clearly identify each button's function. LED indicator lights on each master keypad provide status feedback for the lights and shades throughout your home. They also illuminate softly so that the keypad is easy to find in a darkened room.

## Tabletop Master Keypads

Tabletop keypads provide maximum flexibility to locate the devices where the homeowner can conveniently monitor and control lighting, window treatments, and other home systems. Tabletop keypads are ideal for night stands, coffee tables, and kitchen counters. Keypad buttons are programmed to create a customized control that meets the individual needs of each home.

## In-Wall Dimmers & Switches

...are connected to the lights in your home. They are used in place of standard light switches and provide simple, intuitive operation. Their intelligence allows local control as well as remote control from any of the master keypads.

## Lamp Dimmers

...allow table and floor lamps to be included in the HomeWorks lighting control system. The built-in intelligence allows each dimmer to be controlled from any HomeWorks keypad in the home, as well as from touch screens, universal remotes and other home automation controls. Each lamp dimmer controls one table or floor lamp with simple and intuitive buttons for on/off and raise/lower.

## Car Visor Controls

...provide complete control of the system from the comfort and safety of the car. The remote clips to the car visor or, if the car is equipped with HomeLink, the HomeLink buttons can be programmed to control the HomeWorks system.
